Xiaomi has produced a couple of impressive value for money earphones that sound better than the ones that come with your phone. With several smartphones going jack-less including Xiaomi's very own [Mi 6](#) flagship, the Chinese brand has finally introduced its first ever USB Type-C in-ear headphones.

Not only it supports the new interface, Xiaomi has also added active noise cancellation for a better music experience.

The Xiaomi USB Type-C earphones are available for sale on the Xiaomi website. The earphones are priced at 129 yuan (approximately \$19.50) and are available in black and white. The earphones are compatible with all Xiaomi smartphones that have a USB Type-C port. The earphones also feature active noise cancellation (ANC) technology, which helps to reduce background noise and improve the listening experience. The earphones have a battery life of up to 10 hours and can be recharged using a USB Type-C cable. The earphones are also compatible with Bluetooth and can be used with any smartphone that has a USB Type-C port.
