When the iPad Pro was introduced, Tim Cook has mentioned that it [could replace a laptop](#) for a lot of people. However, if you take away the optional keyboard and Apple Pencil, it's still primarily a consumption device.

That will soon change once iOS 11 begins to roll out to all supported iPads. Read on to find out the top 6 new iOS 11 features that would transform the iPad into a productivity machine.

With iOS 11, Apple has introduced a new multitasking system that allows users to switch between apps more easily. This new system is called 'Slide Over' and 'Split View'. It allows users to open multiple apps at once and switch between them without having to close any. This is a big improvement over the previous system, which required users to close apps to open new ones. The new system is designed to be more intuitive and easier to use. It also allows users to work more efficiently by having multiple apps open at once. This is a great feature for anyone who uses their iPad for work or school. The new system is a big step forward for iPad multitasking. It makes it easier to manage multiple apps and work more effectively. This is a great feature for anyone who uses their iPad for work or school. The new system is a big step forward for iPad multitasking. It makes it easier to manage multiple apps and work more effectively. This is a great feature for anyone who uses their iPad for work or school.
