

Xiaomi's Mi Max was pretty interesting when it first launched. It was essentially a really big Redmi Note 3 and thanks to its gentle price point, users who wanted huge but reasonably powerful budget phablets had a device they could turn to.

Today, Xiaomi reveals the Mi Max's successor. Simply called the Mi Max 2, the new handset is doubling down on battery life.

## Mi Max 2 Big display, bigger battery

6.44"  
large display

Snapdragon 625  
14nm FinFET

5300mAh  
Two-day battery

4GB + 128GB  
High memory options

Sony IMX386  
camera  
Large 1.25µm pixels

Stereo sound  
Auto-switches to  
stereo in landscape

Fingerprint  
sensor

IR Blaster  
Universal remote for TVs  
and air conditioners

Mi Max 2 battery is 5300

With a 5300mAh battery, 6.44" display, 4GB RAM, 128GB storage, 14nm Snapdragon 625 processor, Sony IMX386 camera, IR Blaster, fingerprint sensor, stereo sound, and a large 1.25µm pixel camera, the Mi Max 2 is a true powerhouse.
