

There are a couple of new flagship smartphones running on Snapdragon 835 processor these days. This includes the Sony Xperia XZ Premium, Xiaomi Mi 6, HTC U11 and the Galaxy S8 for the US market. If you're looking for that extra edge, ZTE's sub-brand Nubia has a new flagship smartphone that stands out as an interesting alternative.

Meet the Nubia Z17. It's the first Snapdragon 835 powered device to come with 8GB of RAM and it's also the first to incorporate Qualcomm's latest QuickCharge 4+.

The Nubia Z17 features a 5.5" Full HD display and it runs on Qualcomm's top of the line Snapdragon 835 processor mated to 8GB of RAM and has 128GB of UFS 2.1 storage. This is the second smartphone to feature 8GB of RAM after the [ZenFone AR](#).

For imaging, the Z17 features a dual-camera system with a 23MP + 12MP combo that has a 1.4 micron pixel size and f/1.8 aperture. It boasts a 0.03-second ultra-fast focusing speed and comes with a hybrid 2X zoom feature.
