Solid State Drive SSD is a new generation of storage technology based on NAND flash storage system constructed.

Compared to conventional hard drive, solid-state drives with ultra-high-speed transmission, durable shock, low power consumption, no audible noise, no heat and many other advantages, help to make the overall operation of computer system performance more efficiently

Summary:

- Shock and Vibration Resistance
- Low Power Consumption
- High Speed Performance
- . Super Performance . High Speed Flash Memory . Trim Support . Raid Capability

Get it from TERAZONE IT CENTRE, 5.03, Wisma Sanyan (Parkson), Level 5, No. 1 Jalan Sanyan, 96000 Sibul, Sarawak. Tel: 084-342819.

RM320 normal price NOW you can get it at RM310.00
