

The original Mi Air Purifier comes with dual-fans that's capable of pushing 10,000 litres of purified air per minute with its 9 double blade design. Cleaning the air is a 3-layer HEPA filter which claims to remove 99.99% of PM2.5 particles. It has a CADR (Clean Air Delivery Rate) of 406 m³/h with an effective coverage of 48 m².

Using the Mi Home app, you can adjust the fan speed, set the timer and monitor the air quality in the room. The purifier itself comes with a single power button at the top which you can toggle between auto, silent and full speed.

If you're interested, the Mi Air Purifier at RM399 is available via [DirectD](#) and it comes with a

3-month in-house warranty. They are selling the replacement air filter at [RM199](#) but you could probably find it cheaper from other [retailers](#).

Looking for something newer? The more power efficient and smaller Mi Air Purifier 2 (grey import) is now selling at [about RM560](#). The official [Mi Premium Reseller Store](#) in Penang was selling it for RM529 during its opening but unfortunately it isn't available on their official online store. There's also a more advanced Mi Air Purifier Pro that can cover a room of 60 m²

but the grey import unit is going for [more than RM1,200](#) in Malaysia.
