A native delicacy.

(Picture and content - Copyright of Thelex Dot Com)

DABAI is a native fruit of Sarawak harvested by local natives and sold it in the native market. It can only be found in SIBU. The external colour of **DABAI** is black while the fresh of the fruit is yellow in colour. The seed in the centre is yellow and diamond in shape as shown above. You can only eat 'flesh' inside the seed if you can crack open the seed.
